

Andrey Evtukh

Location: Bialystok, Poland (open to relocation)
E-mail: andrey.evtukh@gmail.com
LinkedIn: <https://www.linkedin.com/in/andrey-evtukh/>

Education

Sep 1996. –Jun 2001

Belorussian State University of Informatics and Radioelectronics,
Faculty of Computer Design,
Engineer's Diploma (Bachelor's Degree).

Experience:

Oct 2025 – Present.

Program Specialist / Full-Stack Developer
ASBIC Co, Poland

Working on the modernization of an internal enterprise admin platform.

- Leading the migration of a legacy AngularJS application to a modern React architecture within an Nx monorepo environment.
- Designing and developing reusable React components and shared UI libraries styled with Tailwind CSS to support scalable and consistent front-end development.
- Building accessible, headless UI components with Spartan NG Brain and Tailwind CSS, following modern headless UI patterns.
- Implementing a design token system with OKLCH color space for perceptually uniform, accessible, and themeable UI styles.
- Implementing authentication with **MSAL Angular** using **OIDC Authorization Code Flow** with PKCE and Bearer token interceptors for secure API access
- Contributing to a microfrontend architecture and working with a BFF layer built on Java Servlets and JSP, enabling optimized data delivery, server-side preprocessing, and legacy system interoperability.
- Actively leveraging Claude AI throughout the development workflow — including code generation, architectural decision-making, refactoring, code review assistance, and documentation — to accelerate delivery and maintain high code quality.

Technologies: Angular 21/AngularJS, TypeScript, SCSS, Tailwind CSS, OKLCH, Spartan NG Brain, MSAL Angular, OIDC (PKCE), AG Grid, Nx, NgRx, GraphQL, Spring Boot, Microfrontends

Apr 2025 – Oct 2025.

Program Specialist / Full-Stack Developer
ITS-Partner (client: Verisure) Poland, Sweden, Norway

Worked on the development and maintenance of a web and mobile platform using Angular and Spring Boot.

- Developed and maintained **Angular** applications using **TypeScript** and **Ionic**.
- Implemented and integrated **GraphQL and REST APIs**.
- Contributed to the **BFF layer** using **Java / Spring Boot**.
- Building accessible, headless UI components with **Spartan NG Brain** and **Tailwind CSS**, following modern headless UI patterns.
- Implementing authentication with **MSAL Angular** using OIDC Authorization Code Flow with PKCE and Bearer token interceptors for secure API access.
- Integrated rule-based decision logic using the **gorules/zen-engine-wasm** library to support dynamic business rules.

Technologies: Angular14-17, NgRx Signals/@ngrx/signals, TypeScript, Ionic, JavaScript, Java, Spring Boot 3,3, GraphQL, MSAL Angular, REST, HTML5, Tailwind SCSS, Spartan NG Brain, Jest, Angular TestBed

Nov 2014. – Feb 2025.

Program Specialist / Front-End Developer

ITS-Partner (client: **Arlo Technologies – Arlo Professional**), United States, Kazakhstan, Poland, Belarus

Worked on a large-scale **web platform for professional video monitoring and smart security devices**, supporting real-time streaming and cloud-connected devices.

Key contributions

- Developed and maintained a **single-page application** using **Angular SSR, AngularJS, and TypeScript**.
- Built responsive UI components with **Angular Material, SCSS, and HTML5**.
- Owned several key modules including **media streaming, SIP communication, and real-time messaging systems**.
- Implemented video streaming features using **WebRTC, DASH, HLS, and Flowplayer**.
- Integrated backend services via **REST and Apollo GraphQL APIs**.
- Implemented real-time communication using **MQTT, SSE, and WebSockets**.
- Contributed to backend services with **Node.js / Express** and **MongoDB / Mongoose**.
- Participated in architecture improvements, **code reviews**, and **technical solution design**.
- Investigated production issues and improved **CI/automation processes**.

Technologies

Angular 17/ SSR, AngularJS, TypeScript, RxJS, Angular Material, HTML5, SCSS,

Angular i18n (\$localize), Jasmin/Karma, JWT/OAuth2/SSO, REST API, Apollo GraphQL, MQTT, SSE, WebSockets, WebRTC, DASH, HLS, SIP.js, Flowplayer Astro, Bootstrap, Underscore.js, jQuery

Aug 2001. – Nov 2014.

Front-End Developer / Technical Specialist

Institute of Information Technologies, Belarus

Front-end developer & support of corporate Web Site, developing of documentation and constructive design for fiber optic measurement equipment.

- Developed and maintained the **corporate website** and internal web tools.
- Created technical documentation and design specifications for **fiber-optic measurement equipment** (GOST, ISO).
- Developed **Flash-based promotional applications** for the company's products.
- Contributed to hardware-related tasks including **device interface development and PCB tracing**.

Practical Skills:

- **Frontend:** Angular 21/SSR, AngularJS, Angular Material, Ag-Grid Enterprise, RxJS, TypeScript, JavaScript, HTML5, SCSS, TailwindCSS, Lodash, jQuery, AG-Grid, Spartan NG Brain, Tailwind CSS
- **Backend & APIs:** Java Springboot, Node.js, Express, REST Api, GraphQL, PostgreSQL
- **Real-time communication:** WebSockets, MQTT, SSE
- **Media streaming:** WebRTC, DASH, HLS, SIP.js, Flowplayer
- **Tools & platforms:** LaunchDarkly, Amplitude Analytics
- **Graphics:** Canvas, SVG, Adobe Photoshop, Adobe Illustrator
- **Languages:** JavaScript, TypeScript, ActionScript 3
- **Languages:** Russian (native), English (Upper-Intermediate)
- **Other:** Business trips to the United States (2018, 2024)

Personal qualities:

Analytical mindset, attention to detail, responsibility, teamwork skills, emotional stability, and a strong commitment to continuous learning.
